1. On 4 January 1952 a number of visitors from the Buero fuer Wirtschaftsfragen (BfW) arrived at the Funkwerke Koepenick to negotiate about the production of "Decimeter" communications-equipment for vehicles intended for the HVA.
2. They wished to establish whether the so-called "Michael" signals equipment was suitable for adaption into ten vehicles which had been specially built for the BfW on orders from the HVA.
3. After they had confirmed that the equipment would in fact fit into the vehicles, the visitors from the HVA decided that a further six vehicles should be built, making a total of sixteen.
4. The Soviet Control Commission has now decided that the "Michael" will be used for all HVA communications vehicles.
